

GRP PIPES

COMPOSITION DESIGN & MANUFACTURE

Yeoman Rainwater GRP Pipes, fittings and clips are glass fibre reinforced mouldings comprising glass fibre reinforcements in the form of laminations fully impregnated with Lloyds approved resins. Special formulations of laminate provide the desired strength and rigidity.

SHAPE & DIMENSIONS

The pipes are supplied in standard length of 1.8m, 0.9m as required, all complete with socket. Standard pipes are shown opposite. Other sizes and sections are available to order.

COLOURS & FINISHES

All pipes are through coloured. The standard finish is a reproduction cast iron surface in Black, and is also available in any BS5252 (inc BS4800) or RAL colour.

STANDARD ACCESSORIES

Shoes, top offsets, side offsets, plinth offsets, branches, bends, loose clips, loose socket with spigot, square to round connectors.

OPTIONAL ACCESSORIES

Special bends and offsets, access plates and rodding eyes to customer requirements.

SILICONE SEALANT & SELA COVERS

The recommended silicone to be used for pipe sealing is a low modulus, reactive cure sealant conforming to ISO11600, available from Yeoman Rainguard.

Sela covers and washers are available in Black as standard and also a limited colour range. However we are able to provide touch up paint where special colours occur.

MAINTENANCE

Yeoman Rainguard GRP requires no maintenance other than periodical cleaning.

AVAILABILITY

Certain of the more popular sizes are normally held in stock. Other sizes are readily available; please contact our sales office for accurate delivery details.
